

Property Management

Fedelta Property Management System (PMS) integration allows the POS system to charge meals and drinks directly to the room management system. The integration allows guests to conveniently pay for goods on checkout alongside their accommodation and extra charges. Integrations are available with all popular systems with comprehensive setup options and auditing.

Learn how Fedelta work with Property Management System

Key Features

{slide=Wide Variety of Integrations }Fedelta integrates using Industry Standard messaging allowig it to communicate with the majority of PMS providers. Having a "tried and tested" solution is essential to ensure that guests are charged appropriately.
{/slide}

{slide=Bill Authorization}Bill authorization and signature capture is provided at the POS. The room occupants are displayed at POS for simple verification of the guest and the applicable room. {/slide}

{slide=Bill Breakdown}The Bills breakdown is sent through to the PMS so that the charge details are available in both systems. As well as any products and service charges, tips can be applied to room charges as a seperate charge.
{/slide}

{slide=Customizable Setup} Setup of PMS accounts can be defined in a matrix of order type and POS location allowing ultimate flexibility in posting to the Property Management System. This avoid the necissity of manual transaction and consolidation of transactions.{/slide}
