

Point of Sale

Fedelta is a Point of Sale software package that boasts speed, ease of use, reliability and an extensive range of powerful features. The touch screen solution provides the flexibility to customize the POS terminal to suit your individual needs. Fedelta allows you to run your business with existing processes providing the opportunity to place greater focus on your customers.

The solution provides staff with the necessary tools at the Point of Sale to deliver unprecedented customer service. Processes are streamlined to eliminate confusion, decrease the time required for staff training and create a more efficient way of working.

Key Features

`{slide=Flexible Ordering Modes }` Fedelta caters for Quick Sale Service, Tab and Table management, Pickup and Delivery, Lay-by, and Held Sales. Each mode provides support for: the ordering of quick touch items; the recognition of barcoded product (normal and price embedded); searching for products; and scale integration for weighed items. The comprehensive printing subsystem provides automation of related ordering dockets applicable to each order type. `{/slide}``{slide=Complete Pricing Control }` A selection of features are available in order to tailor the solution to your pricing requirements. Unlimited Pricing Levels and Product Specials can be utilised from the Point of Sale each of which include the ability to specify an override, fixed markup, fixed markdown, percentage markup, and percentage markdown. Creating schedules for these features provides the certainty that customers are paying the right prices at all times. Discounts, Prompt for Price, Price Overrides, Priced Product Extras are other examples of the extensive control that you gain over pricing with Fedelta Point of Sale.`{/slide}``{slide=Staff Management and Access Control }` Decide exactly what staff can and can't access. Fedelta employs a fine-grained security access model that puts you in charge of all Point of Sale activity. User identification can be determined by user pin, magnetic swipe cards, or proximity watches. The Point of Sale provides a convenient location for staff to enter their shift start, break start(s), break end(s), and shift end. The single-click approach ensures a simple approach and accurate records. `{/slide}``{slide=POS Stock Management }` Access to stock management from the Point of Sale is imperative for maintaining accurate stock records. Intuitive features that handle processes such as Wastes, Stock Transfers, and Sale Voids can be easily accessed and utilised, decreasing the likelihood of employees delaying or avoiding the recording of events.`{/slide}``{slide=Reliable and High Performance Platform }` It is essential to run your POS solution on a platform that you can rely on. Fedelta is built on industry leading technology and has a proven track record of providing organisations with stable, fast performing, and feature rich systems. Intelligent features such as "Offline" mode ensure that you are trading at all times. `{/slide}`
