

## Backoffice

Fedelta Backoffice comprises detailed management features including Product and Pricing Control, Stock Control, Staff Management, Point of Sale Configuration, Loyalty Rewards, Accounts, Audit Control and a comprehensive set of Reports and Analysis Tools.

All information can be accessed in real-time both onsite and remotely over the web, so that business decisions can be based on accurate, timely information.

Learn how Fedelta can streamline your Back Office processes

### Key Features

`{slide=Product and Pricing Control}`Unlimited Pricing Levels and Product Specials can be maintained from the Back Office each of which include the ability to specify an override, fixed markup, fixed markdown, percentage markup, and percentage markdown. Creating schedules for these features provides the certainty that customers are paying the right prices at all times. Discounts, Prompt for Price, Price Overrides, Priced Product Extras are other examples of the extensive control that you gain over price management with Fedelta Back Office.`{/slide}`

`{slide=Powerful Stock Control }`Stock can be accurately maintained through the use of purchase orders, order requisitions, supplier invoices, stocktakes, stock transfer batches and wastage. By performing detailed audits on stock usage you can quickly highlight any discrepancies between theoretical levels and those on-hand.`{/slide}`

`{slide=Staff Management}`Employee records including personal, employment, financial, and contact information can be easily maintained in Fedelta Back Office. Fine grained access security can be assigned for staff allowing total control over what employee can access at both POS and Back Office applications. Shift management is also included; providing the ability to edit POS shift logins or create entries manually.`{/slide}`

`{slide=Manage and Track Accounts}`Fedelta caters for debtors, management or promotional expense, outgoings, or voucher account templates. Specific options such as credit limits (fixed or duration based), loyalty price level/discounts, invoicing terms, account contacts, etc can be explored within each of the available templates.`{/slide}``{slide=Reports}`Reporting exploits the Fedelta as an information system providing an intuitive interface into business critical data. Equipped with a comprehensive library of reporting options you can be confident that your information requirements are handled.
