

# Online Stock Ordering

Fedelta integrates with online suppliers to provide automated ordering and invoicing. The proven import process avoids the pain involved in double entry of purchasing information lodged with suppliers. Not only does this provide the most precise mean of supplying information; it also is the most time effective.

Direct access to the latest stock information from your online supplier means no-fuss, no-question ordering combined with invoicing free of mismatching to the order. Fedelta's online supplier invoicing is the ultimate solution when it comes to your stock ordering needs.

## Key Features

{slide=Integrations with popular suppliers including ALM, HLW, and ILG }Major distributors offer online integration with their latest price books. Access to the latest information ensures there are no discrepancies between purchase orders and supplier invoices removing the need for time-consuming communications.{/slide}{slide=Automatically generated purchase orders, receive orders and supplier invoices }By integrating with your online distributor you can import the invoice directly into Fedelta. The system is smart enough to create all invoicing steps (purchase through to invoice) or realise if part of the invoicing process has taken place in order to create the appropriate links.{/slide}{slide=Power through flexibility }Fedelta provides the necessary mechanisms to order the way appropriate for your organisation. {/slide}
